RECENT EXPERIENCE

Airtable
May 2024 — Now

Senior Software Engineer
- Expanded automations for complex logic, unblocking $27M+ ACV at Amazon, Nike, and others
- Led enterprise secrets to GA for Amazon, Meta, Ford, and others, unblocking $13M+ ACV
- Owned reliability for Automations, the system every enterprise customer's workflows run on
- Ran the reliability overhaul that ended repeat outages and cut MySQL contention 3x
- Built Airtable's MCP eval infrastructure from scratch, catching failures before customers

Halo (Acquired)
Jan 2026 — Aug 2026

Co-Founder
- Built a TypeScript EMR from scratch nights and weekends, two engineers, live with patients
- Took it from negative revenue to profitable in its first year, then to acquisition
- Shipped e-prescribing, telehealth, fax, and SMS on AWS inside a HIPAA-compliant boundary
- Built a software factory where Linear tickets spawn parallel agents that ship their own PRs

PREVIOUS EXPERIENCE

Dapper Labs
Sep 2022 — Aug 2023

Senior Frontend Engineer
- Halved load times on NBA Top Shot, one of the largest consumer NFT marketplaces
- Built the navigation, leaderboards, and marketplace surfaces in React and GraphQL

Yelp
July 2019 — June 2022

Full Stack Software Engineer
- Owned consumer messaging end to end, from scoping and design through production
- Re-architected the messaging stack in React, cutting the cost of every change after it
- Mentored three engineers and trained the team through on-call rotations
